

## **ABSTRACT OF THE DISCLOSURE**

5      Aggregates of cellulose-containing particles, such as particles of waste paper and optional other vegetation or waste particles are used as a carrier for additives such as insecticides, herbicides, fertilizers and nutrients. The particles can be also used as a carrier for insect repellants, preferably naturally occurring insect repellants, to repel insects from rooms, buildings, plants, and outdoor areas, and to carry adhered seeds onto an area to be planted with seeds.
